

Otto Bock[®]

QUALITY FOR LIFE

Centro A3

Product Information

Affordable and Reliable

With the Centro A3 Otto Bock adds a new entry-level model to its lightweight wheelchairs: Affordable and in proven Otto Bock quality. Indeed, this goes beyond the standardized customary tests by the independent testing institutions, the Centro A3 naturally fulfils the much stricter internal Otto Bock Test Criteria.

As a result of our highly effective stock keeping, we can guarantee short delivery times. Take your pick among the 8 reliable and durable variants of this model, select the version and the desired quantity and we will deliver in the shortest possible time.

Centro A3

The Entry-level Model in the Lightweight Segment

Light and Functional

Aluminium is used to construct the frame of the Centro A3. Consequently, the weight is clearly reduced compared to a standard wheelchair.

The side panels can be swung away to the rear, are very easily removable, and height adjustment is standard at no additional cost. The optional push-button, height-adjustable side panels, which can be adjusted to the user at any time and without additional tools, are even more convenient. Naturally, the Centro A3 can be easily folded together to a convenient size for easy transportation. The variants with drum brakes allow convenient and certain braking by the attendant.

Product Characteristics

- Silver-coloured frame made of aluminium
