

lipomed® basic

## Compression pantyhose

- Dual fastener for a secure grip
- Additional massage effect thanks to the nubbed structure
- Skin-friendly material

### The shaping compression pantyhose against irregular contours

lipomed basic is a product line that uniquely combines medical safety and economic efficiency. The high-quality material optimises shaping and prevents irregular contours. lipomed basic is comfortable and inconspicuous under clothing. This increases comfort in wear and the effect.

#### *Product benefits*

- Dual closures for twice the hold: the combination of the row of hooks and Velcro fastener makes it easier to put on and gives a secure grip.
- Pinpoint skin contact: the nubbed structure gently massages the tissues and supports the compression effect without causing stress.

#### *Material components*

45% elastane, 55% polyamide
