

Application and Fitting Guide

HEELIFT® brand Suspension boots are soft, latex-free foam boots designed to:

- Elevate the heel while lying down
- Protect the foot and ankle from injury due to pressure, friction, and shear forces
- Allow the patient to reposition as needed while HEELIFT® stays in place on the lower limb
- Customizable heel offloading boot which can be accommodated to offload other at-risk areas in addition to the heel in order to prevent secondary ulcers/injuries.

Proper Sizing and Care

**The built-in splint and non-slip traction sole allows for weight-bearing transfers with assistance.

	Standard	10 - 15 in (25 - 38 cm)
--	----------	----------------------------

Available with:
Smooth or Convuluted interior

✓ Single Patient - Multiple Use

Hand Wash Machine Wash Machine Dry Low Sanitize

Secure straps and place boot in laundry bag or pillowcase before machine washing with gentle detergent. Do not use bleach.

Easy Application and Fit

1

Measure for correct sizing. Place foot inside boot with the heel above the opening.

2

Thread straps through D-rings. Secure the straps.

3

• Using two fingers, test each strap.
• Test the fit.

CAUTION: Make sure straps are not in contact with skin.

4

• Check to confirm heel is off-loaded using heel opening.
• Boot should not move on the leg.

WARNING: As per standard of care, remove HEELIFT® boot and inspect skin every 8 hours to ensure no compromise of the skin has occurred. Application and customization of the boot should only be performed per the discretion of the healthcare provider after reviewing IFU cautions and warnings.
