

EUROCHAIR STOCK VERSION 1.750

USER PROFILE

- ✓ For permanent everyday use
- ✓ For optimum fitting for a wide range of medical conditions through high adjustment variability
- ✓ Primarily for use at home, but also in rehabilitation clinics for achieving therapeutic goals
- ✓ For taller and larger users

INDIVIDUALLY ADAPTED

The EUROCHAIR presents numerous possibilities for adjustment without having to swap parts and is therefore ideal for individual adaptation. The position of the drive wheel can be adjusted horizontally and vertically for even greater flexibility. Very short modification times, high variability thanks to retrofit kits, and low weight make everyday handling easier.
